

# Colombia: Event Data Validation Project, Data Codebook \*

**Logan Stundal, Ban Bagozzi, John Freeman, Jen Holmes**

## Table of variables

- Include a nicely formatted table of *variables*, *variable names in data*, *descriptions*, and *units* here.

Variable	Name	Description	Unit	Source
Var 1	Var 1	Var 1	Var 1	Var 1

OR —

Variable	Data.Name	Description	Units
a	bob	a	a
b	bill	b	b
c	other bill	c	c

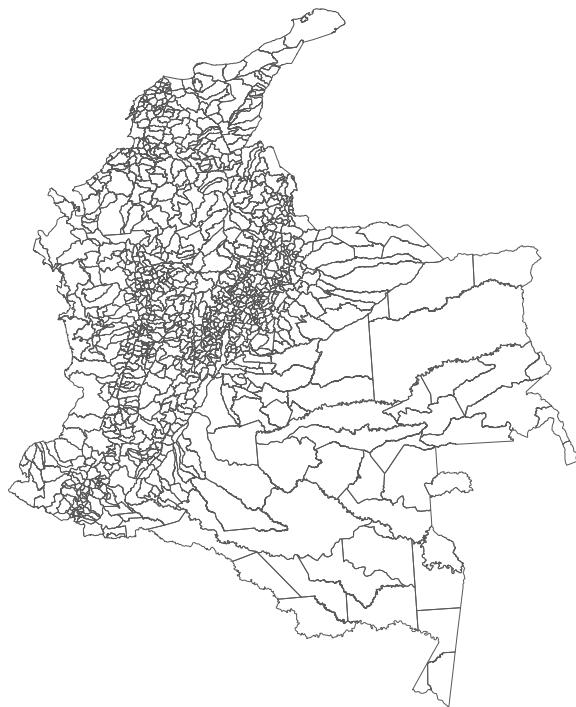

The following sections provide more detailed information on these variable constructions.

---

\*Document date: January 24, 2020

## Units of Analysis and Shapefile

The shapefile for our Colombia data come from the United Nations Office for the Coordination of Humanitarian Affairs, hosted on the Humanitarian Data Exchange: [HDX](#). The file contains coordinate information for Colombia's 1117 municipalities. San Andres and Providencia, a department in the Caribbean, was dropped from this base map file due to their distance from mainland Colombia resulting in a final base map of 1116 municipalities<sup>1</sup>.

**Figure 1:** Colombia, Level 2 Municipalities (n = 1116)

---

<sup>1</sup>GADM, a repository hosting spatial data on administrative units, has [errors](#) in its version of Colombia's municipalities map.

## **Event Data**

*ICEWS*

*GED*

*CINAP*

## **Covariate Data**

*PRIO*

*Mountains Mean*

*Forest Mean*

*Google Earth Engine*

*World Population*

*Forest Cover*

*Night Lights*

*Rough Terrain Index*

Note, this sources is from xyz.
